South Jakarta

Computer Science undergraduate with hands-on experience in data analytics, data visualization, and ETL through academic and project-based work. Experienced in using Python and SQL for data cleaning, exploratory data analysis, statistical analysis, and data transformation. Familiar with machine learning, data warehousing concepts, and visualization tools including Power BI and Tableau, with an interest in applying data-driven insights to real-world problems.

Education Level

Universitas Bina Nusantara - Jakarta <i>Bachelor of Computer Science, 3.85/4.00</i>	Sep 2024 - Jul 2028 (Expected)
---	--------------------------------

Projects

Sales Data Analytics

Python, Pandas, Matplotlib, NumPy, Seaborn, Scikit-learn, SciPy

- Conducted an end-to-end sales data analytics workflow following the CRISP-DM framework, from data preparation and exploratory analysis to statistical testing and predictive modeling.
- Cleaned and explored a 2,500-row sales dataset, addressing missing values, inconsistent categorical data, and invalid records before conducting statistical hypothesis testing and simulated A/B testing.
- Built and evaluated classification models using feature selection and cross-validation to analyze factors associated with online and retail sales channels.

Data Engineering / ETL Project

Pentaho, MySQL

- Developed an end-to-end ETL pipeline in Pentaho to transform, validate, model, and prepare data for analytical and machine learning use.
- Implemented data quality and transformation processes, including missing-value handling, data type correction, consistency checks, and basic validation rules.
- Designed and implemented a star schema and automated ETL job execution using Pentaho .kjb jobs and Windows Task Scheduler, producing a flattened and encoded dataset for machine learning.

Experience / Activities

S-Class BINUS Kemanggisian - Jakarta <i>Sigma Lab Member</i>	Feb 2025 - Present
--	--------------------

- Participated in project-based technical learning program

Student Advisory and Support Center BINUS - Jakarta <i>Mentor Scholarship Awardee</i>	Sep 2025 - Jan 2026
---	---------------------

- Mentored 5 Computer Science students on semester 3 coursework, primarily focusing on Artificial Intelligence and Database Technology.
- Provided academic guidance and facilitated discussions to support students' understanding of course materials.

Teach For Indonesia Student Community BINUS - Jakarta <i>Community Program Education Activist</i>	Feb 2025 - Jan 2026
---	---------------------

- Tutored elementary school students in Mathematics and English through community education activities.

Skills & Certification

- Hard Skills** (2026): Programming & Querying (Python, SQL), Data Analysis (Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis), Data Visualization (Power BI, Tableau, Matplotlib), Data Engineering (ETL, Pentaho, MySQL), Machine Learning (Scikit-learn, Classification, Model Evaluation).
- Soft Skills** (2026): Analytical Thinking, Problem Solving, Communication, Team Work.
- Certification** 🌐 (2025): Microsoft Certified: Azure AI Fundamentals (Issued by Microsoft July 28, 2025).
